

K-2 Literature Investigations 2nd edition

Kindergarten

In Investigations 2nd Edition, a selection of children's literature relating to the mathematical content of a specific unit is included in every Family Letter. These books are offered as one of the ways that families can support their child's mathematical experiences at home. Many teachers also like to display a selection of these books on the classroom bookshelf over the course of the unit. In Kindergarten, occasionally a book is suggested as part of a math lesson and several titles are suggested to the teacher. The use of literature is offered as a suggestion for introducing an idea or activity and is thus considered an optional material rather than the centerpiece of a math lesson. The following is a list of Kindergarten units which include suggestions for using children's literature.

Grade 2

In Investigations 2nd Edition, a selection of children's literature relating to the mathematical content of a specific unit is included in every Family Letter. These books are offered as one of the ways that families can support their child's mathematical experiences at home. Many teachers also like to display a selection of these books on the classroom bookshelf over the course of a unit. In Grade 2, two units suggest using a piece of children's literature as part of a math lesson. In both cases an alternate story is provided for the teacher to use (instead of the book) and thus the use of literature is considered an option rather than required material. The following two Grade 2 units include suggestions for using children's literature:

Unit 1, Counting, Coins and Combinations, suggests using the book *Two of Everything: A Chinese Folktale* by Lily Hong (optional)
